## PERSONAL PROJECTS

### Scissors Project

2023

*Frontend Developer*

- I developed a URL Application library which shortens URLs to align with user brand identity. Utilize custom slugs, branded links, and domain customization options to reinforce user brand presence and enhance user engagement.

### Crowdfunding-product-page

2023

*Frontend Developer*

- I developed a Bookmark Application which enables users to view the optimal layout depending on their device's screen size, See hover states for interactive elements, Make a selection of which pledge to make, See an updated progress bar and total money raised based on their pledge total after confirming a pledge, See the number of total backers increment by one after confirming a pledge, Toggle whether or not the product is bookmarked.

### Other projects

- Todo app
- Calculator
- Netflix clone
- Food ordering site
- Weather converter

## Technical Skills

- Advanced  
Html, Css, Javascript, Reactjs
- Intermediate  
Tailwind css, Vuejs, Typescript
